

# CDC NHM&E Data Variable Set (DVS) Updates

## November, 2015

The primary purpose of this document is to summarize the changes in the updated NHM&E DVS (version date: Nov-15) compared with the last version of the DVS (Comprehensive NHM&E DVS, version date: 17-Mar-14-corrected).

All questions regarding the NHM&E DVS must go to the NHM&E Service Center at [nhmeservice@cdc.gov](mailto:nhmeservice@cdc.gov) or 1-855-374-7310. NHM&E Service Center Hours are Monday through Friday, 8:30 am to 5:00 pm ET.

### *Types of Changes*

The current NHM&E DVS includes all data elements collected by PEB as required by program announcements PS12-1210, PS12-1201 Categories A, B or C, PS11-1113 Categories A or B, PS15-1502 Categories A or B, and the MSM Testing Initiative, and etc. PEB decided to create one NHM&E DVS because many data elements are shared between grantee activities of counseling and testing (CT), partner services (PS) and risk reduction activities (RRA). However, not all tables and data elements in the NHM&E DVS will apply to all grantees.

The major updates are following:

- Additional value codes were added to the *program announcement/program strategy* data element.
- Added 30 aggregate variables (ME201a – ME222a-z) representing data that were previously collected as part of the PS12-1201 Interim Progress Reports (IPRs) and Annual Progress Reports (APRs). These data can now be directly key entered into EvaluationWeb® and used to produce pre-programmed PS12-1201 Data Tables.
- Four PS variables (PCR202a, PCR209, X303a and X503) remained in the DVS, but are no longer required. They were removed from PS schema version 2.1.
- Added 30 Budget Table (BT) variables but deleting 33 previous BT variables.
- Added 14 variables for CDC-directly funded CBOs funded under program announcement PS15-1502.
- In the table below
  - a. MODIFIED indicates length of allowable text or value codes were changed;
  - b. REVISED indicates definitions and/or business rules were changed, and
    - i. Underlined text in revised business rules indicates the change
    - ii. Crossed out text in revised business rules indicates deleted rules
  - c. ADDED indicates the data element is entirely new;
  - d. REMOVED indicates the data element and all associated definitions and/or business rules have been removed.
